MANUFACTURING CIO'S SYMPOSIUM

Tackling Today's New Manufacturing Tech Challenges

The COVID19 pandemic & Industry 4.0 are driving the manufacturing industry to modernize their technology, accelerating digital transformation efforts. The next industrial revolution is here, focusing not just on advanced technologies, but on the collaboration between humans and smart systems. Now is the time for manufacturers to be implementing smart, connected and robust digital capabilities to prepare for a more responsive and resilient future.

The Manufacturing CIO's Symposium, which will be brought to you virtually, to discover the trends that will define the manufacturing industry in the years to come. Hear from industry leaders as they discuss the current and future of Industry 4.0 and Industry 5.0, analyse upcoming trends and provide examples from the innovations and transformations happening in their own organizations.

The online summit platform brings together attendees in a single virtual room - concentrating the event's focus on a series of high-profile content sea, creating online conversations in a series of small, group conversations, creating a relaxed environment for discussion, and enabling everyone to lean in and be a part of the industry's most important conversation.

VIRTUAL AUDITORIUM

NETWORKING LOUNGE
