VIRTUAL EXHIBITION AREA

OPENING PANEL DISCUSSION

Proposed Scope of Panel Conversation

Central banks across the globe are engaged in exploring Central Bank Digital Currency (CBDC) - A study by the Bank for International Settlements (BIS), says 86% of central banks globally are researching Central Bank Digital Currencies (CBDC) while 60% are currently experimenting with it and 14% of are in the pilot testing phase with CBDC. RBI as per recent announcements plans to introduce a digital monetary asset in a phased manner soon.

- Is it the right time for CBDC in India?
- How will it tie-in to the current monetary system and payments landscape?
- How will RBI's CBDC impact bank deposits, payments & private cryptocurrencies?

PANEL DISCUSSION

Proposed Scope of Panel Conversation

Cross-border payments have traditionally been a time- and effort-intensive process that take away from the customer experience. Despite the widespread adoption of internet banking, cross border transactions can take days. FinTechs have transformed the landscape by introducing innovative solutions to some of the major challenges related to cross-border payments. The industry is expected to experience another major shift with the introduction of faster payment rails like Unified Payments Interface (UPI) in the cross-border payment ecosystem, which can significantly increase the accessibility of cross-border payments, reduce costs and simplify the entire process.

PANEL DISCUSSION

Proposed Scope of Panel Conversation

Recent RBI announcements (Non-bank access to CFTs, PPI Interoperability) indicate that the non-bank led payments ecosystem in India, which was in a stabilizing phase until now, is geared up for rapid progression.

- How do banks react to/counter this?
- Dependence of non-banks on banks for payment processing operations
- How do we maintain a balance with the entry of players with deep pockets and a competitive technological edge?
